## Run 2364

The pack gathered at **Kung Poo** and **Pussy Lane's** for another Monday night of frivolity, except for yours truly who decided it was closer and cheaper to go straight to the Riverview Tavern for a B club drink stop.

I was reliably informed that the actual set run was pretty damn good, going through the tracks and roads and creeks near the Uni. I am sure it would have been the best run I have been on all year if I had decided to partake.

After the run the pack had a few rehydrating beverages before the circle was called.

Plenty of charges were given including returnees **Cockless**, **Sex Pistol**, **Rooster** and **Streaker**.

**Cockless** also received his 150/200 run awards, at least he only received a couple in one night, not 150 badges like I did quite a few years ago when we had a really shit GM.

The POW shirt went to **Sum Cunt** and the Erectus was handed to sum new runner - Michelle I think was the name.

**Booga** told a joke about some of his latest clients winning some money and buying some land, first time they won anything in a while apparently.

The raffles were won by, as well pointed out by **Shocker**, some **super mega fugly** pricks.

Nosh was served to the pack with a choice of great curries and rice.

The pack then gradually headed off home after another great night of Hashing, except for a couple of blow in reprobates who decided to try to put a dent in **Kung Poo** and **Pussy Lane's** wine fridge.

Great night, great run, great nosh (and great reds).

## The Penis Study

The American Government funded a study to see why the head of a mans Penis was larger than the shaft. After 1 year and \$180,000, they concluded that the reason that the head was larger than the shaft was to give the man more pleasure during sex.

After the US published the study, the French decided to do their own study. After \$250,000 and 3 ears research, they concluded that the reason the head was larger than the shaft was to give the woman more pleasure during sex.

The Irish, unsatisfied with those findings, conducted their own study. After 2 weeks, a cost of around \$75.46, and many pints of beer, they concluded that it was to keep a mans hand from flying off and hitting himself in the forehead.
